MERGING+ANUBIS

Remote Control Application for MERGING+ANUBIS

From your system Remote Control the MERGING+ANUBIS from distance.

The Remote Control is complementary to the Anubis Web Access remote and will provide to the user the same display and functions as those available on the MERGING+ANUBIS touchscreen display.
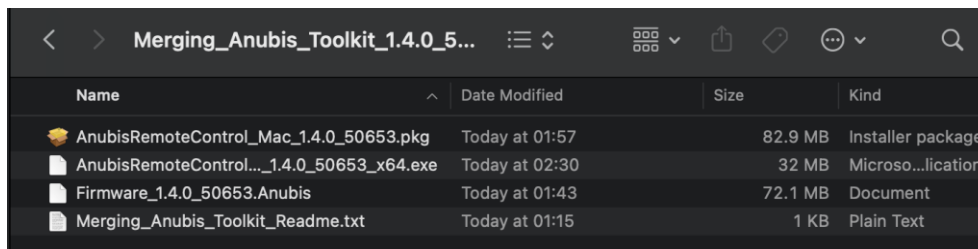

Requirements

- Download Merging Anubis Toolkit
- Install the Remote Control
- Update your Firmware
- Run on your system either: MAD, VAD, ANEMAN or MTDiscovery.

Download the Anubis Toolkit

https://www.merging.com/support/downloads#current-anubis-downloads

Once downloaded extract the zip content

Toolkit content

Name	Date Modified	Size	Kind

MERGING✚ANUBIS

Installation:

Important: In order for the MERGING+ANUBIS Remote Control application to function it is mandatory that you update the MERGING+ANUBIS firmware to the same build version.
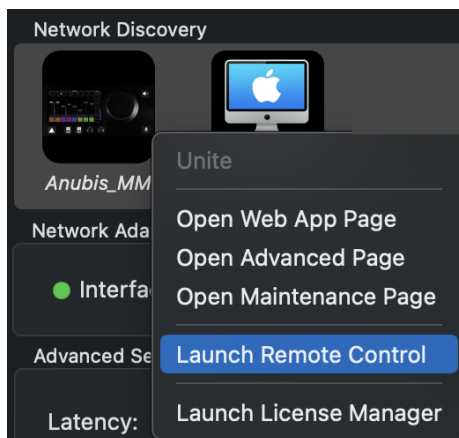

The Remote Control should be installed on the same system where either; MAD (Windows), VAD (Mac), ANEMAN or MTDiscovery are installed and where the MERGING+ANUBIS RAVENNA/AES67 port is connected too (directly or via a network switch).

We recommend to update the firmware through the Anubis Maintenance Page (from MAD, VAD, ANEMAN or MTDiscovery)

Note: Google Chrome is the recommended browser for firmware updates.

Launch and operate

Once the Remote Control and Firmware have been updated the Remote control can be launched from the MAD, VAD, ANEMAN or MT Discovery context menu (right click on Anubis Icon)
